

Pensteel IBC Jacket

Export Insulated Jacket – Type DISPCVIBC

Designed to be a low cost insulated jacket for the export market, the “DISPCVIBC” is produced as a low cost insulated cover and is an ideal option if you will not be having them returned for re-use. Manufactured from Polyester with the inner “bubble” pocket produced from Low Density Polyethylene, this combination provides a jacket that has good tear resistance and heat retention. Our jackets can withstand temperatures of between minus 40°C to plus 60°C and can be supplied with a document pocket if required. Please note this jacket does not have access to the valve or top cap areas so cannot be fitted prior to filling.
